General Tools

Algebra Tiles (CPM)

This tutorial describes how to use the Algebra Tiles including additional features.

Click on the link below to access eTool.

[Algebra Tiles \(CPM\)](#)

1. The top bar has three main parts: Pen & Paper Icon, '?' Icon, and the Arrow Icon.

1. Select the Pen & Paper Icon to:

Options - Add Title and Description and Enable/Disable Tools.

Clear Tiles - This will remove all the tiles that are in the tile area.

Save - This will save all the changes made.

2. Select the '?' icon for directions.

3. Select the Arrow Icon at the right to open and close the tray.

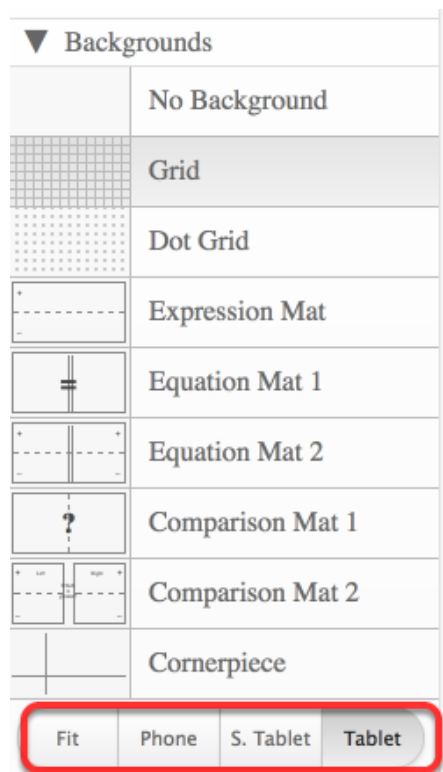

2. Drag tiles from the tray at the left to the display area at the right.

1. Select one of the tiles and drag it to the tile area.

2. Use the sliders in the tray to change the size of the tiles.
 3. Double click tiles to change orientation (horizontal/vertical).
 4. Click on a tile once to change the sign (+ -).
- Note: The color of the tile will turn to red for negative sign.

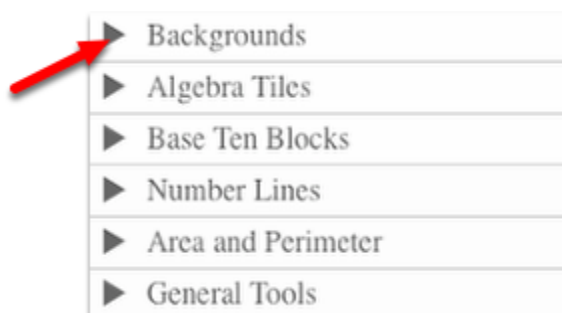

3. Choose from a variety of different mats. Also choose from a variety of sizes to fit on various devices.

4. Choose from a variety of different tiles:

- Click the arrow next to the tool to view/hide the options for each tool.

Desmos Graphing Calculator

This free graphing calculator allows students to create a free account to save all of their graphs, animations, and projects created.

Click on the "Desmos Graphing Calculator" link below.

[Desmos Graphing Calculator](#)

1. Click on all of the buttons. Try it out! For extra help, click the "?".

2. Click on the interactive tours below for help to create:

[Sliders](#)

[Tables](#)

[Advanced Tables](#)

[Restrictions](#)

3. The interactive tours will NOT let you make a mistake! Try the links above!

Interactive Tours

Team Desmos

posted this on December 29, 2013 22:13

Try one (or all!) of the interactive tours to learn more about sliders, tables, restrictions, and more:

4. Need additional help? Watch these very short excellent videos!

Text

Area and Perimeter (CPM)

Click on the link below to access the eTool.

[Area and Perimeter \(CPM\)](#)

1. Drag the tiles and toothpicks to the display area. Double click toothpicks to rotate.

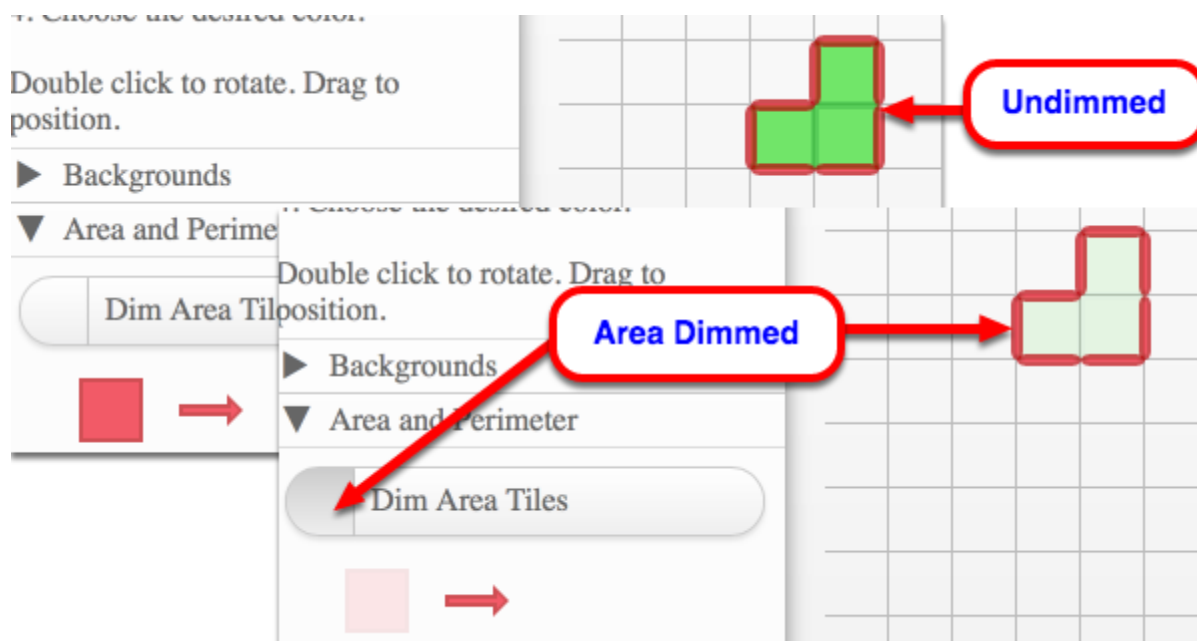

2. Toothpicks Settings

1. Click the toothpick and hold to view the toothpick settings.
2. Click one of the arrows at the end of toothpick to adjust the length.
3. Select the tip you want to use.
4. Click the "Change color" button to change the color of the toothpick.
5. Double click the toothpick to rotate.
6. Click and drag to move the toothpick.

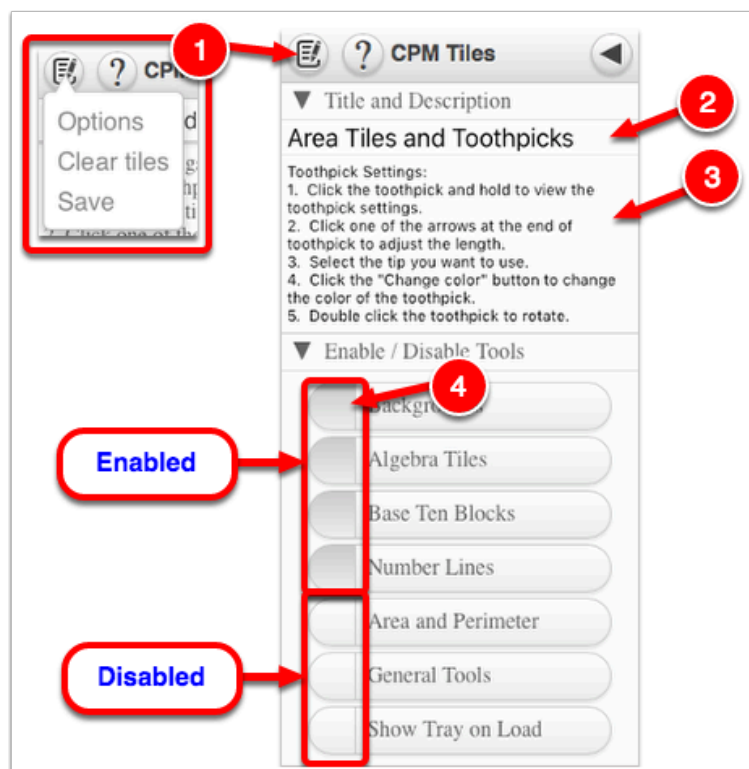

3. Dim Area showing the perimeter more sharply.

4. Explore the Options Menu:

1. Click the Paper & Pen Icon and select 'Options'.
2. Add a title.
3. Add description.

4. Click the button on the left of each tool name to enable/disable.

Base Ten Blocks (CPM)

Use this tool for percents and counting out of one hundred.

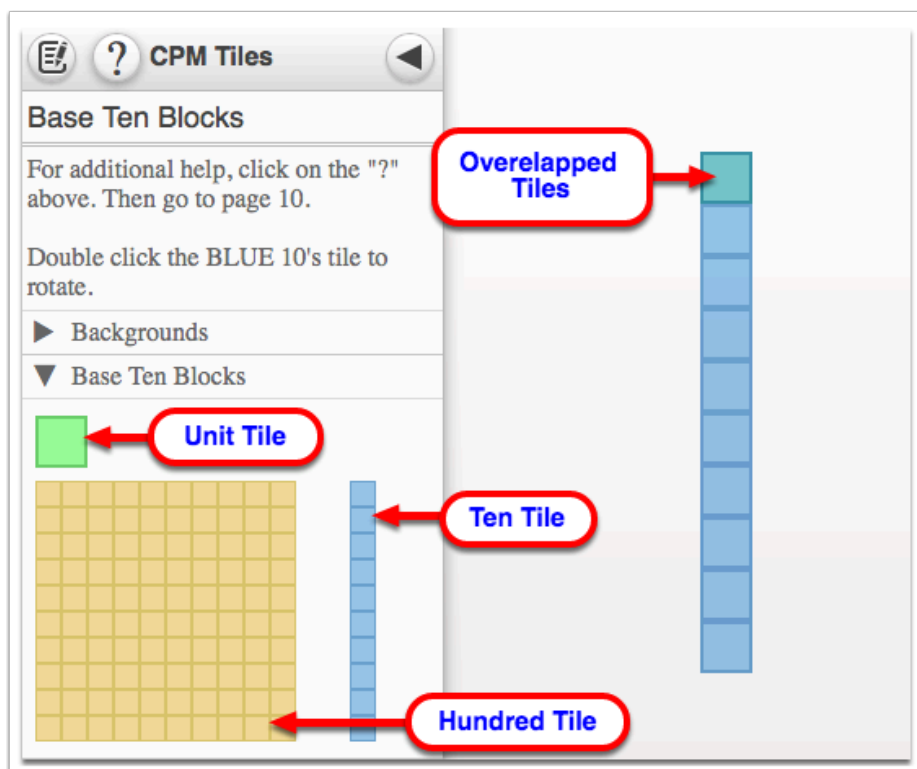

Click on the link below to access the eTool.

[Base Ten Blocks \(CPM\)](#)

1. Drag Base Ten Blocks from the tray to the display area.

- Unit Tile
- Ten Tile
- Hundred Tile

Notes: Tiles can be overlapped.
Tiles will snap to the grid.

2. Double click to rotate.

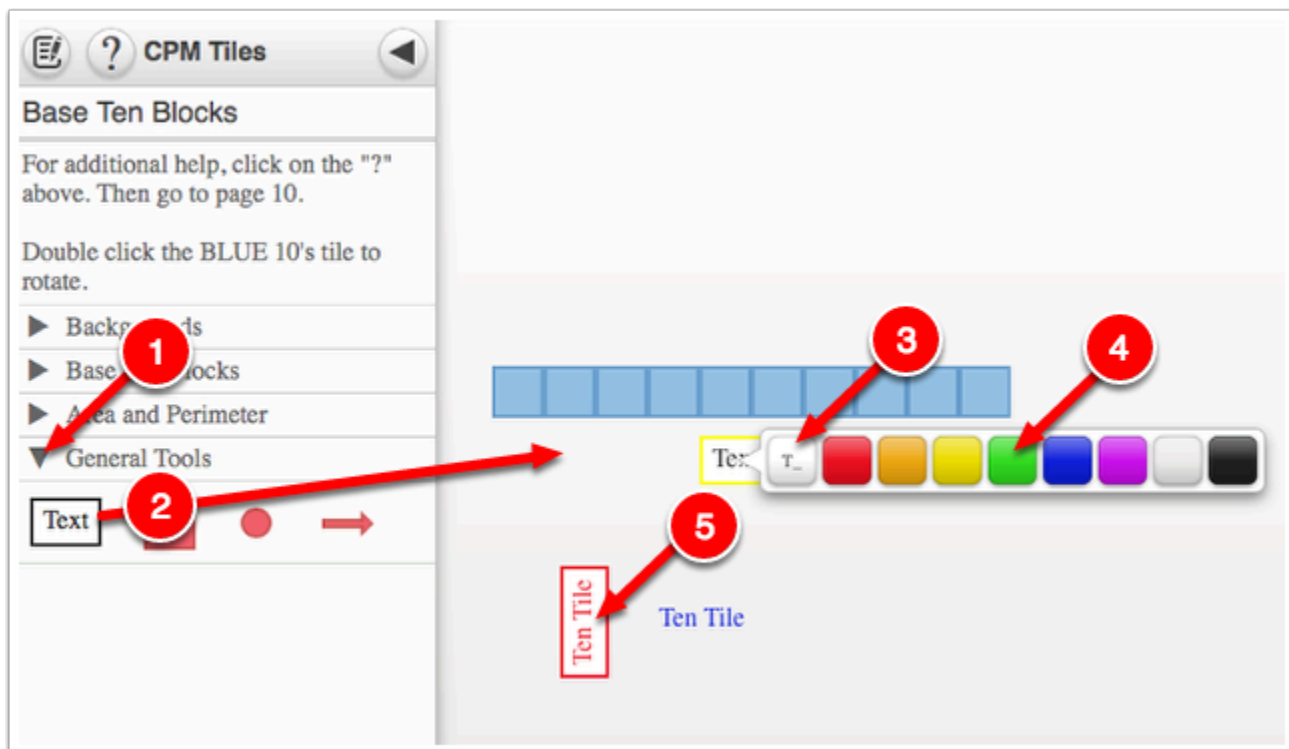

3. Add text.

1. Click the arrow before the 'General Tools' to view.
2. Click the Text Box and drag it to the display area.
3. Click the 'T_' icon to add/remove text border.

Note: If the Text Box settings do not display automatically, right click on the Text box.

4. Choose the font color you want to use.
5. Double click the Text Box to rotate.

+/- Tiles & Number Lines (CPM)

Click on the link below to access the eTool.

[+/- Tiles & Number Lines \(CPM\)](#)

Number Line:

1. Click the Number Line icon and drag it to the display are.
2. Right click on the Number Line to display and adjust the settings.
3. Click one of the arrows at the end of the Number Line to adjust the length.
4. Click the '+' or '-' to adjust the step.
5. Drag the number line to change the position of the numbers.
6. Double click the Number Line to rotate.

+/- Tiles:

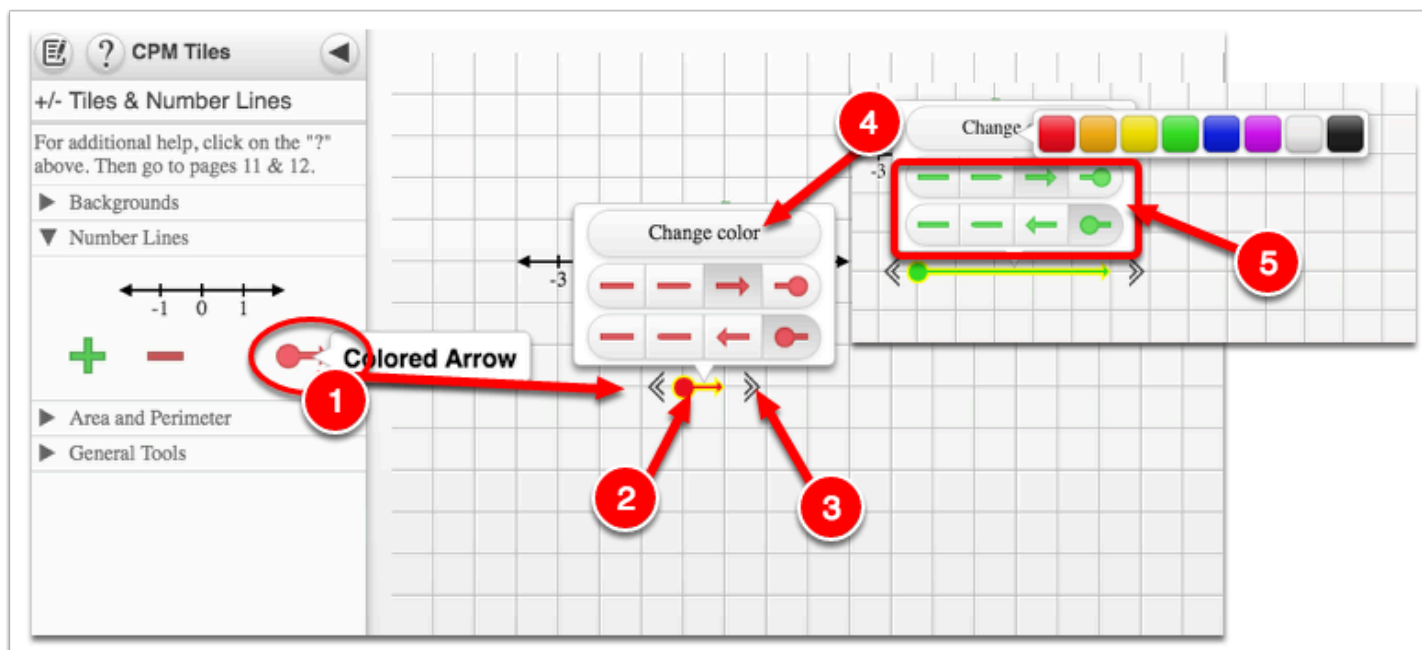

1. Click the '+' or '-' tiles and drag it to the display area.
2. Click the '+' or '-' to change its color to gray.

Colored Arrow:

1. Click the 'Colored Arrow' icon and drag it to the display area.
2. Click on the 'Colored Arrow' and hold -OR- right click to view the settings.
3. Click one of the arrows at the end of the icon to adjust the length.
4. Click the 'Change color' button to change the color of the toothpick.
5. Select the tip you want to use.

6. Double click the 'Colored Arrow' icon to rotate.
7. Click and drag the 'Colored Arrow' icon to move.

Rigid Transformations eTool (CPM)

This eTool will record the steps you create showing translation, rotation, and reflection.

Click on the first link for the eTool. Click on the video links to view the use of the eTool.

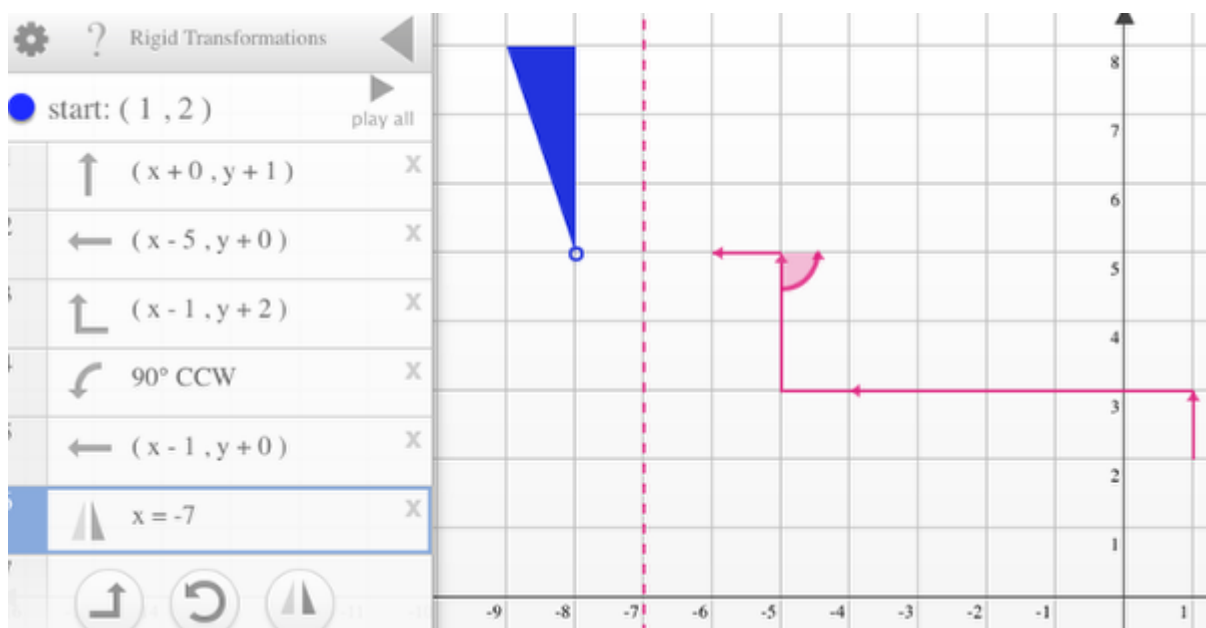

- Twelve games using the key lock are also available.
- This tool is designed so that teachers/students can create many more games.

[Rigid Transformations](#)

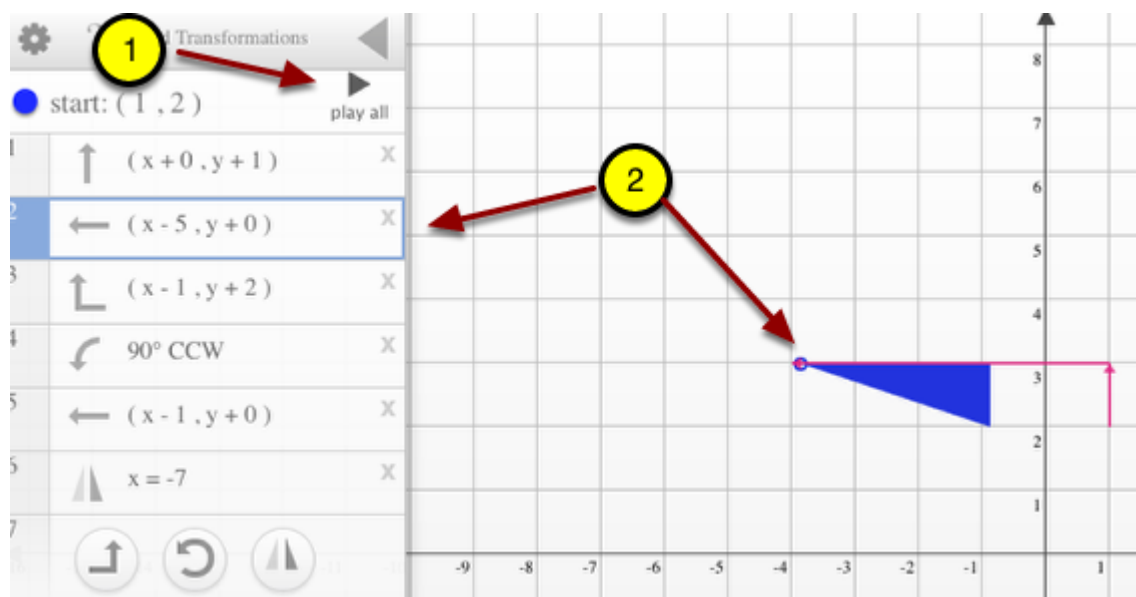

[Using RT Tool](#)

[Creating an RT Puzzle](#)

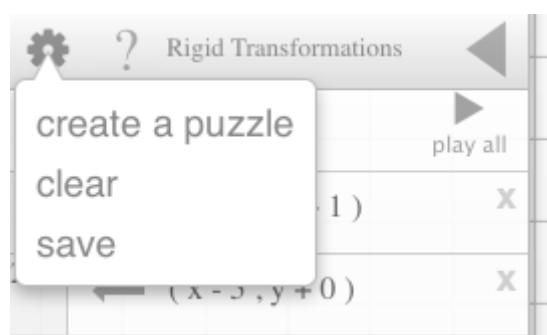

1. Steps are shown in the Tray at the left while the action occurs in the Display Area at the right.

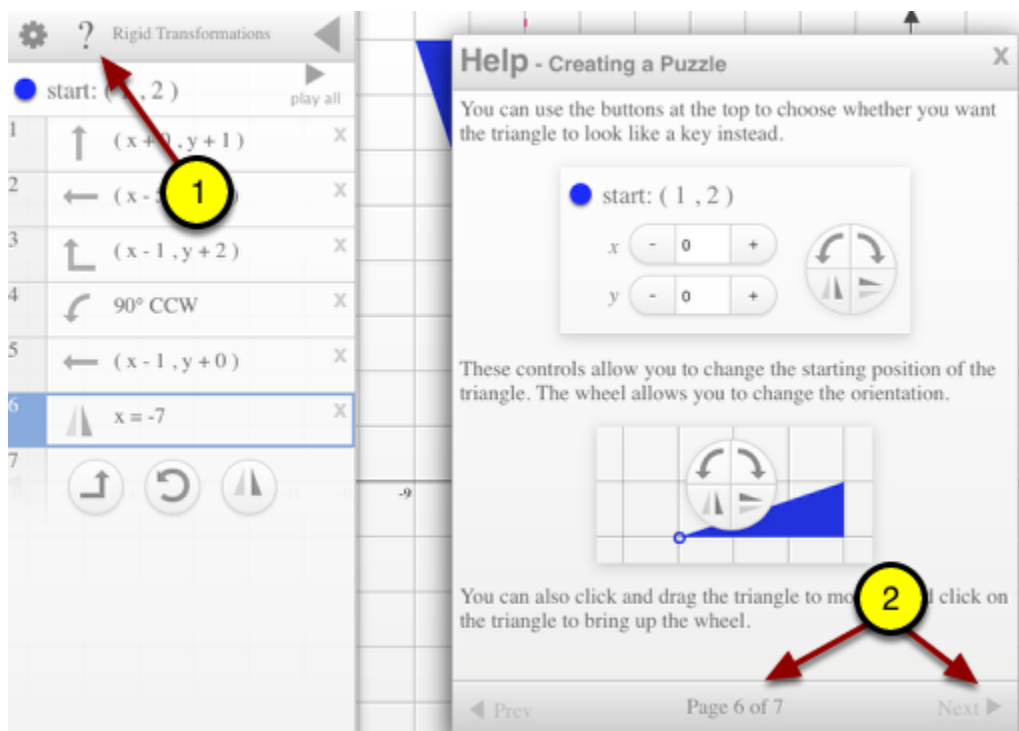

2. When playing, active steps are highlighted.

3. In the gear menu, you can create puzzles, clear, or save your projects.

4. Check the "?" for more help or watch the videos above.

Data Representations (CPM)

Click the link below for “CPM Data Representations”

[CPM Data Representations](#)

1. CPM Data Representations:

Type in up to two sets of data into the columns under the Data Sets tab. Click the wrench to sort or change the graph color. Click the Data Sets arrow to hide the data.

2. Single-Variable Statistics or the Stem and leaf Plots:

When choosing Single-Variable Statistics or the Stem and Leaf Plots from the left tray, the data/plot(s) show from the right. Unclick from the left to close the trays at right.

3. Box Plots

Note: Use the zoom in and out buttons at the upper right to position the histograms in a friendly window. On a computer, you can use the mouse wheel. On a tablet, use two fingers to pinch or spread data.

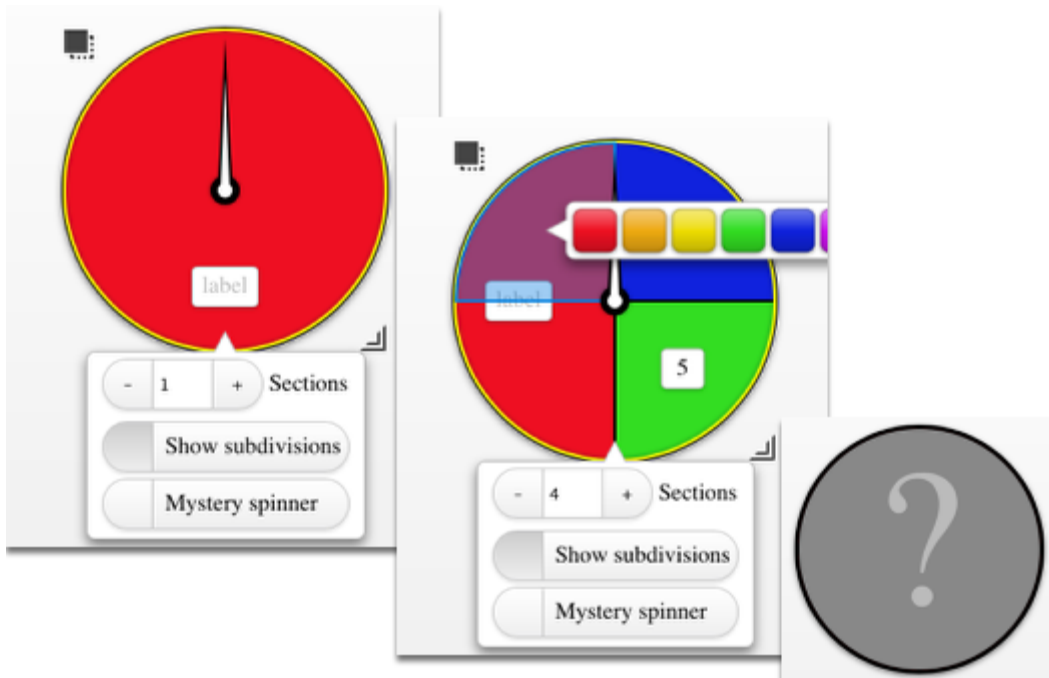

Probability Tools (CPM)

Click on the link below.

[Probability Tools \(CPM\)](#)

1. Spinners:

- Drag one or more spinners to the board.
- Resize the spinners.
- Choose color, number of sections, and labels.
- Hide subdivisions.
- Create Mystery Spinners.
- Click the spinners to spin.

2. Dice:

- Drag one or more dice to the board.
- Choose dice color.
- Redesign the die with a variety of color, dot numbers, or Arabic numbers.
- Click each die to spin.

3. Bag:

- Drag one or more bags to the board.
- Choose the number, shape, and color of bag contents.
- Choose with or without replacement.
- Choose the number of items to draw.
- When finished, click the bag to shake and draw.

4. Coins:

- Coins are labelled "H" for Heads and "T" for Tails.
- Choose the color.
- Drag one or more coins to the board.
- Click each of them to spin.

5. Standard Deck of Cards:

- Drag one or more decks to the board.
- Choose with or without replacement and the number of cards draw at once.
- Modify the deck by eliminating specific cards or entire suits or number.
- Click the deck to draw the cards.

6. Random Number Generator:

- Drag the random number generator to the board.
- Indicate the number of integers to generate.
- Indicate the range for each random number.
- Click to randomize.

MC2 1.1.4: Frog Jumping Contest Video

Click on the Video link below to view the Frog Jumping Contest.

[Frog Jumping at Calaveras County](#) 

1. Frogs are given three jumps. The frog with the longest distance wins!

MC2 1.1.5: .999... Video (Vimeo)

This lesson includes a QuickTime® animation to demonstrate how $0.999\ldots$ can geometrically be represented as a sum of fractions that converge to 1.

Click the link below to watch the 42 second video.

[Does .999... Equal 1? \(Vimeo\)](#) 

1. What happens when you add all of the parts?

Does $0.999\ldots$ equal 1?

2. Teacher Notes:

- Project this animation at the specified point in problem 1-42 to provoke discussion about using geometric representations of numbers to help make sense of their size.
- Test the technology setup before students arrive to be sure that it is working properly.
- The animation is less than a minute long and moves quickly. You might want to have the students first watch the animation at full speed. Then, replay the animation, pushing the pause button each time the shape is further divided to give students a chance to look more closely at the graphics.
- Pausing periodically also provides an opportunity to check students' understanding of the divisions that have been made to that point.

MC2 1.2.1: 1-42 & 1-44 Student eTools (CPM)

Click on the links below.

[MC2 1-42 The Giant Spin eTool \(CPM\)](#)

[MC2 1-44 Student eTool \(CPM\)](#)

1. MC2 1-42 Student eTool: The Giant Spin

MC2 1-42 The Giant Spin

At a carnival, the most popular game is the Giant Spin, where players spin a giant wheel divided into 24 sections that are labeled with the numbers -2, -1, 0, 1, 3. The number that the spinner lands on determines whether a player will win a prize. The winning number and the prize change every day.

- Probability Tools
- General Tools

2. MC2 1-44 Student eTool

1-44 Spinner eTool

Lila is making a spinner game for her cousins to play. She has divided it into 8 equal sections, and has labeled each one with a symbol. When the spinner lands on a flower, her cousins will win a prize.

- a. What is $P(\text{Star})$?
- b. What is $P(\text{not Diamond})$?
- c. What is $P(\text{Flower})$?
- d. If Lila's cousins spin 100 times, about how many times would you expect them to spin a heart?

- Probability Tools
- General Tools

MC2 1.2.3: Rewriting Fractions as Percents (Vimeo)

Click the link below for the 27 second "Rewriting Fractions as Percents" Quicktime Animation.

[Rewriting Fractions as Percents QuickTime Animation](#) 

1. This lesson includes a QuickTime animation demonstration of how a fraction to percent conversion can be geometrically represented. The diagrams in the animation match those in problem 1-95.

2. Teacher Notes:

- Project this animation as part of a class discussion for 1-95.
- Test the technology setup before students arrive to be sure that it is working properly.
- Start the animation, and use the pause button to stop it after each major change to the diagram so that students have time to make sense of what is happening on the screen.
- Consider asking questions about what has changed or giving students time in teams or with a partner to summarize what has happened before continuing the animation.
- After students have made sense of the animation by examining each piece, play the animation through at full speed.

MC2 1.2.4: 1-81 Student eTool (CPM)

Click on the link below.

[MC2 1-81 Student eTool \(CPM\)](#)

1. MC2 1-81 Student eTool:

1-81 Student eTool

1-81. Thomas helps around the house by doing one chore after school. Each day Thomas and his aunt use the spinner below to decide which chore he will do. Here is what Thomas knows:

- The sections on the spinner for "rake leaves" and "do laundry" are the same size.
- The sections for "clean bathroom" and "vacuum" are equal in size and together make up half the spinner.

a. What is the probability that Thomas will spin "do laundry"?

b. Thomas hates to clean the bathroom. When he spins the spinner, what is the probability that it will not point to "clean bathroom"? Explain how you found this answer.

MC2 1.3.1: Long Division Video (Vimeo)

Click on the link below to view the "Long Division" Animation.

[Long Division Animation \(Vimeo\)](#) 

Long Division Example

How many whole pieces
will each person get?

Long Division Example

Divide each stick into tenths.

Long Division Example

$$\begin{array}{r} 2.6 \\ 5 \overline{)13.0} \\ \underline{-10\ 0} \\ 3\ 0 \end{array}$$

Now distribute the remaining tenths among the five groups.

Chapter 2

MC2 2.1.1: 2-2 Student eTool (CPM)

Click the link on below for the “2-2 Student eTool (CPM).”

[MC2 2-2 Student eTool \(CPM\)](#)

1. Using the colored arrows, record the frog's movements.

MC2 2-2 Student eTool

Directions: Move the green dot on the number line at right to model the movement of the frog. Solve parts (a) through (d).

Part (a): If the frog hops to the right 4 units, to the left 7 units, and then to the right 6 units, where will the frog end up?

Part (b): If the frog makes three hops to the right and lands on 10, list the lengths of two possible combinations of hops that will get it from 3 to 10.

Part (c): Could the frog land on a positive number if it makes three hops to the left? Use an example to show your thinking.

Part (d): Additional Challenge: The frog made two hops of the same length to the right and then hopped 6 units to the left. If the frog ended up at 11 on the number line, how long were the first two hops?

▼ Number Lines

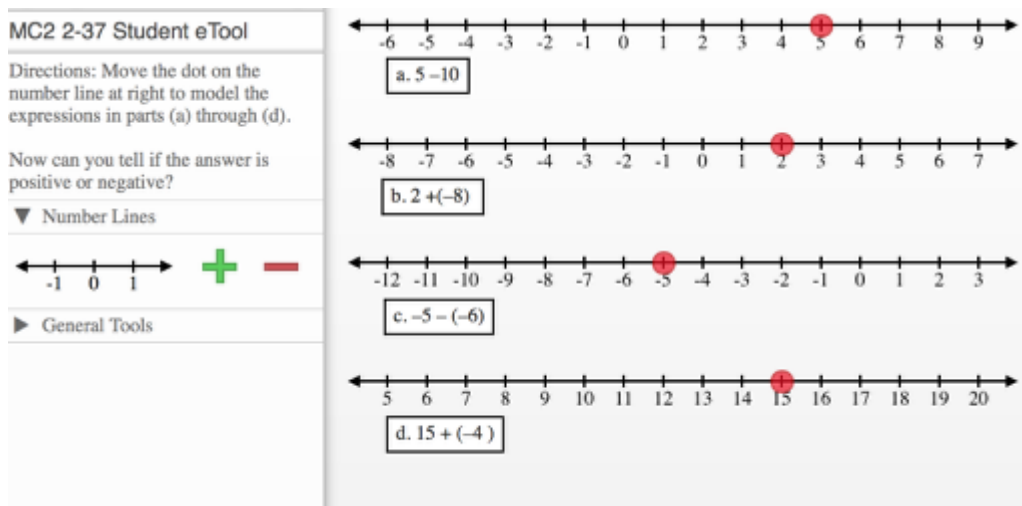

-1 0 1 + -

MC2 2.1.3: 2-37 Student eTool (CPM)

Click the link on below.

MC2 3-24 Student eTool:

The screenshot shows the "CPM Tiles" interface. On the left is a sidebar with a settings icon, a help icon, and the title "CPM Tiles". Below this is the title "MC2 3-24 Student eTool" and directions: "Directions: Use colored toothpicks to indicate the side lengths. Label each length." The sidebar has three expandable sections: "Backgrounds", "Algebra Tiles", and "Area and Perimeter". Under "Area and Perimeter", there is a button labeled "Dim Area Tiles". Below the button is a red square icon and a red arrow icon. At the bottom of the sidebar is a section for "General Tools".

The main area displays three figures labeled a, b, and c, each constructed from algebra tiles:

- a.** A large blue square tile labeled x^2 with a vertical red toothpick on its right side labeled x .
- b.** A vertical blue rectangle tile labeled x with a small blue square tile labeled 1 attached to its bottom right corner.
- c.** A large blue square tile labeled x^2 with two horizontal blue rectangle tiles labeled x attached to its bottom side, and a small blue square tile labeled 1 attached to the bottom right corner of the second x tile.

The screenshot shows the homepage of the Old Farmer's Almanac website. At the top, there is a banner for "THE OLD FARMER'S ALMANAC SINCE 1792" with a "SHOP NOW!" button. Below the banner is a navigation bar with links: Home, Weather, Moon & Astronomy, Gardening, Best Days, and Cooking & Recipes. The "Weather" section is active, displaying "Current Weather" and "Long-Range Weather Forecast". The "Current Weather" section includes a link to "Find your 2-month long-range forecast here." and a link to "Get weather predictions for the entire year. Order your 2015 Almanac today!". The "Long-Range Weather Forecast" section features a map of the United States with various regions labeled: Pacific Northwest, Pacific Southwest, Great Lakes, Great Plains, Upper Midwest, Lower Midwest, Ohio Valley, Deep South, Southeast, and Florida. Below the map, there is a "Weather History" section with a "Location:" field, a "ZIP/Postal Code or City, State" field, and a "Month: Day: Year:" field. The "Weather Forecast" section includes a "Weather Blog" with a link to "Early Snow—Cold Winter?" and a snippet of text: "Chicago, the windy—errr, snowy —city. was hit by snow during".

How Big is a ... ?

The head of a pin is about 2mm in diameter. Use this animation to compare the sizes of cells and organisms sitting on a pinhead. Nearly invisible without magnification, dwarf pollen grains and human cells. In turn, bacteria and viruses are even smaller.

11-46: Walking the Dog

Marcus and his brother always argue about who will walk the dog. Their father wants to find a random way of deciding who will do the job. He invented a game to help them decide. Each boy will have a bag with three colored blocks in it: one yellow, one green, and one white. Each night before dinner, each boy draws a block out of his bag. If the colors match, Marcus walks the dog. If the two colors do not match, his brother walks the dog. Marcus' father wants to be sure that the game is fair. Help him decide.

Note: RED is replacing the WHITE in the simulation at right.
